Denys Yepik

Poznań, Poland | +48 788 547 995 | yepik.denys@gmail.com | linkedin.com/in/yepik-denys

Education

Poznan University of Technologies

Bachelor degree of Information and Communication Technologies (Expected 2027)

Technical Experience

System & Network Administration – **Linux and Windows Environments**

- Configured VPN servers using OpenVPN and WireGuard
- Established remote SSH connections over VPN
- Managed user roles and privileges for secure system access

Back-End Development & Automation – **Python, JavaScript, C++**

- Built Python web servers using Flask, Socket, and Asyncio for asynchronous communication
- Developed RESTful APIs with Node.js (JavaScript)
- Utilized C++ for network programming including TCP/UDP communication

Database Integration – **PostgreSQL & MongoDB**

- Designed and integrated PostgreSQL databases for a forum web application
- Applied MongoDB for efficient Big Data storage and processing

Network Configuration – **Cisco & Huawei Equipment**

- Configured LAN/WAN networks with VLAN, DHCP, ACL, OSPF, Static Routing
- Set up NAT, VPNs, and BGP for complex networking solutions

Leadership Experience

- **Led a 10-member team** during LAN configuration projects, focusing on task distribution and group coordination to maximize performance
- Experienced in managing multilingual teams (**English, Polish, Ukrainian, Russian**)
- Thrive in team environments, actively seeking new challenges that foster individual and collective professional growth
